

VSAid Crack

VSAid provides a single-window interface where you can easily navigate through your project and all of its contents (solution, projects, files, etc.) in one place. VSAid gives you an instant tree view of your projects which makes it easy to navigate to where you want to be - such as the definition of a specific function, header file or assembly. You can navigate easily by projects, files, modules, directories or folders - whatever you need to do. Not only can you quickly find files and project files, you can also choose to add projects to VSAid right from the Project window. This lets you quickly organize projects as you need them. If you create a new project in one window, it will open in the same window. For example, if you create an external project, it will appear in the project explorer window. Additional Features: Change/rename project files at the click of a button Find files (even within a solution) easily Manage your source control repository while working Annotate files with bookmarks Syntax highlighting for C, C++, C#, HTML, XML and PHP Edit, compile and run files and projects from the toolbar Able to open specific versions of projects (great for defining new projects from an old version of a project) Able to get a list of modules for a project and compile them one at a time Use VSAid to resolve your C/C++ build errors at the click of a button Built-in syntax highlighting for C, C++, C#, HTML, XML and PHP Additional features for working with VSAid: One-button Build / Rebuild, Clean / Compile Quick Access to the Solution Explorer, Refactoring Toolbar, Module Manager and more One-button Import / Export of Files One-button Compile and Run Syntax Highlighting Tools Rename, Add Bookmark, Rename and Undo Bookmark Toolbars Extendable with user-developed extensions (available as part of VSAid's API) Able to expand any pane to fill the entire available space Tools for working with VSAid: New Solution: - Creates a new solution from an existing one, and adds the project files and modules that are part of that project to VSAid - Optionally add a project to VSAid Open Project: - Opens the project file in the current window

VSAid Free License Key

Macro used to display/hide views. Useful to show specific functions within VSAid or on specific projects. vsaSelectionAddrAddr is a macro used to highlight a specific address in the source code in a function, typically the "this pointer" or "vsaSelection" struct. Used for editing the "this pointer" on a function definition or editing the struct definition of the "vsaSelection" struct. The macro adds an extra editor to the "Edit" menu for the current object and then adds a new key binding "vsaSelectionAddrAddr". (See Options | Customize | Keyboard). vsaListAddrAddr is a macro used to highlight a specific address in the source code in a function, typically the "this pointer" or "vsaList" struct. Used for editing the "this pointer" on a function definition or editing the struct definition of the "vsaList" struct. The macro adds an extra editor to the "Edit" menu for the current object and then adds a new key binding "vsaListAddrAddr". (See Options | Customize | Keyboard). vsaLineAddrAddr is a macro used to highlight a specific address in the source code in a function, typically the "this pointer" or "vsaLine" struct. Used for editing the "this pointer" on a function definition or editing the struct definition of the "vsaLine" struct. The macro adds an extra editor to the "Edit" menu for the current object and then adds a new key binding "vsaLineAddrAddr". (See Options | Customize | Keyboard). vsaSelectionAddrName is a macro used to highlight a specific address in the source code in a function, typically the "this pointer" or "vsaSelection" struct. Used for editing the "this pointer" on a function definition or editing the struct definition of the "vsaSelection" struct. The macro adds an extra editor to the "Edit" menu for the current object and then adds a new key binding "vsaSelectionAddrName". (See Options | Customize | Keyboard). vsaListAddrName is a macro used to highlight a specific address in the source code in a function, typically the "this pointer" or "vsaList" struct. Used for editing the "this pointer" on a function definition

What's New in the VSAid?

This version of VSAid enables you to work on existing projects and solutions. You can open multiple projects at the same time by right clicking on the file you wish to open. Simply choose the project you wish to open and click the Open button. The VSAid Icon is also a command to open a project. Features: 1. Fast Find for Projects 2. Quick open of files, even if you haven't got the file path 3. Cyclic find for projects 4. Open Solution from Code Snippet 5. Open Project File from Code Snippet 6. Add a project file to search path These are covered in the Productivity Guide under: VSAid 4.0 > Tools > Project List > Toolbar > Fast Find. You may also find the information on how to use the Quick Open feature useful. This is covered in the Productivity Guide under: VSAid 4.0 > Tools > Project List > Toolbar > Quick Open. Instructions 1. Download VSAid and extract it into any folder you wish. 2. Restart Visual Studio. 3. Open the folder where you extracted VSAid, double-click the 'VSAid_40.vsix' file. 4. Click Next to continue. 5. Click Next to continue. 6. Click Install to install VSAid. 7. Click Finish to close the installer. 8. The VSAid Toolbar will now be available under the View menu. Future Releases ===== Version 4.1 ----- - Fix the Installation - Other bugfixes. Version 4.0 ----- - Added and fixed lots of functionality. - New files are not displayed on the Open dialog. Known issues ----- Version 3.7 ----- - "Open Solution from Code Snippet" is bugged. The command does not work, but seems to do nothing. Version 3.6 ----- - The "Open Project File from Code Snippet" command does not work. The project file is opened with the currently active document open. Version 3.5 ----- - Right clicking on the Project Manager toolbar and choosing "Add Command..." fails. - When pressing the Ctrl+Shift+Y keyboard combination, the context menu does not show up. Version 3.4 ----- - Not all VSAid Commands work with Visual Studio 2008. For example, "Open Project File from Code Snippet" does not work. You can only open one project file with this command. - The Project Manager toolbar shortcuts (CTRL+S and CTRL+U) do not work with Visual

System Requirements For VSAid:
